

Dr. Kerstin Lienemann, Deutsches Institut für Lebensmitteltechnik e.V. (DIL)

is Head of the DIL Office Brussels since 2009. The German Institute of Food Technologies (DIL) is a research institute with a core interest in food process technologies and material sciences as well as its interfaces to the agricultural and nutrition sciences. Within the scope of her activities she is responsible for all kind of trans-national, European (FP7, H2020) and world-wide public funded research activities of DIL. She is active in the European *FOODforce* network, contributed to the EIT Food preparation phase (DIL is member of the EIT Food) and was engaged for a long time in the ETP Food for Life. Her experience ranges from coordination of large European projects to several other roles as strategy development, consortium building, fund raising, project negotiation, and legal & financial issues in more than 20 European projects. From 2006-2009 she headed the Liaison Office of two German research organisations (German plant breeders /GFPI e.V. and German food industry /FEI e.V.). Kerstin Lienemann holds a PhD in Agrobiology.
